US Patented

# The Gauntlet Pro Cinch, Pro, & Gauntlet (Compression/Support)

## Gauntlet Pro Cinch

Provides controlled support and circumferential compression of the ankle with the addition of an anatomically designed elastic sleeve. Figure eight strapping that is silicone enhanced aids in controlling inversion and eversion of the ankle. The cinch lacer allows for a one handed application and tightening of the brace by the wearer.

## Gauntlet Pro

Provides controlled support and circumferential compression of the ankle with the addition of an anatomically designed elastic sleeve. The sleeve aids in the alignment and positioning of the brace and includes figure eight strapping around the forefoot that is silicone enhanced to control eversion and inversion.

## Gauntlet

Extreme low profile fit with above ankle securing collar which allows wearer to adjust the brace with the shoe on. Figure eight strapping around the forefoot that is silicone enhanced, controls eversion and inversion. Achilles saddle prevents posterior pinching.
